2. Of the state-owned locomotives, 22 were parked as a reserve for the Directorate General, Railroads, Berlin, and 11 for the regional railroad headquarters.²
3. Of the column locomotives, 224 were operational and 99 were being kept cold as a reserve.³
4. Seven state-owned locomotives and 30 foreign-owned locomotives were deactivated in February 1953.
5. A total of 153 locomotives of various types was hired out to industrial enterprises for factory requirements.⁴

25X1 1. Comment.

No comparable data are available for January 1953. As compared with December 1952, the number of state-owned locomotives decreased by 6 units, which were deactivated; 16 locomotives from the park of damaged locomotives were transferred to the park of operational locomotives. The park of damaged locomotives decreased by 22 units, while the park of operational locomotives increased by 6 units. The total number of column locomotives remained constant while the number of serviceable column locomotives increased by 15. The total of foreign-owned locomotives decreased by 31 units which were deactivated. See paragraph 4 of the present report. These locomotives were probably deactivated in connection with the scheduled scrapping of 209 locomotives. The total number of narrow-gauge locomotives increased by 2 units, which are probably newly manufactured equipment.

25X1 2. Comment. The locomotive reserves of the Directorate General, Railroads, Berlin and of the regional railroad headquarters increased by 4 and 11 units respectively, which indicates an improvement of the locomotive situation in East Germany.

25X1 3. Comment. The number of operational column locomotives increased by 14, that of column locomotives kept in reserve by 1.

25X1 4. Comment. In December 1952, 152 locomotives were hired out to industrial enterprises.
